WORK EXPERIENCE

Research Assistant

Aug 2023 – Present

University of Houston

Houston, TX

- Refactored university's Cascade CMS website, cutting load latency 28 % & boosting organic traffic 30 % via SEO.
- Engineered distributed YOLOv8 inference on AWS Batch + S3, processing 50 K images at 98 % mAP.
- Architected Street-View crawler expanding GIS coverage 40 % by indexing 10 K undocumented road signs.
- Automated geospatial validation via coordinate hashing, removing 90 % manual QA and cutting <2 h.
- Delivered AI-powered map-editor features through Agile sprints, raising analyst workflow efficiency 25 %.
- Secured \$1.2 M road-safety grant by conveying findings to cross-function partners and technical leads.

Software Developer

May 2024 – Aug 2024

MentoringTime.com

Houston, TX

- Constructed micro-service mentor-matching platform (React, Node, AWS), scaling to 5K+ users in 3 months.
- Integrated JWT auth plus Stripe, securing 10 K+ monthly payments and enforcing least-privilege access.
- Rolled out live analytics dashboard elevating user engagement 60 % and doubling appointment bookings.
- Accelerated match engine via vector search, boosting pairing precision 40 % and customer retention 30 %.
- Streamlined CI/CD with Docker and GitHub Actions, cutting release lead-time 50 % via blue-green deploys.
- Instrumented distributed tracing, cutting P95 API latency 45 % and enabling rapid root-cause analysis.

Data Analyst Intern

Mar 2022 – Aug 2022

Phoenix Global

Hyderabad, India

- Analyzed 3M+ GooglePlay apps with PySpark, exposing engagement levers that lifted session time 25 %.
- Built GBM models predicting install counts at 85 % accuracy using review scores, APK size, and version.
- Designed data-rich dashboards querying PostgreSQL, guiding 10 product teams on launch-priority decisions.
- Applied regression and A/B statistics to optimize feature mix, raising marketing ROI 15 % across cohorts.
- Tuned Spark partitions, cutting ETL runtime 35 % and compute spend 20 % while maintaining data integrity.

SKILLS

Programming Languages Java, C++, C#, Python, JavaScript / TypeScript, SQL

Cloud / DevOps AWS (Lambda, EC2/ECS, S3), Docker, Kubernetes, GitHub Actions, CI/CD

Framework Spring Boot, .NET, Node.js, Express.js, React, jQuery, Bootstrap

Databases PostgreSQL, MongoDB, DynamoDB, Redis

Core CS Distributed systems, algorithms & data structures, object-oriented design

Methodologies Agile/Scrum, customer-obsessed delivery

EDUCATION

M.S. Computer Science, University of Houston, Houston, TX

GPA: 4.0/4.0

May 2025

Coursework: Distributed Systems • Advanced Algorithms • Computer Architecture • Data Visualization

B.Tech Computer Science, GITAM University, Visakhapatnam, India

GPA: 8.59/10

2019 – 2023

Coursework: Data Structures & Algorithms • Database Management Systems • Software Engineering • Web Application Development • Computer Networks • Artificial Intelligence • Operating Systems • Cloud Computing

PROJECTS

Optimizing Spotify Data Pipeline (AWS)

Aug 2023 – Dec 2023

- Built serverless ETL on AWS Lambda, S3, and Athena trimming ingest time 40 % while scaling to 1 TB daily.
- Partition-tuned Glue SQL queries, cutting analytics latency 35 % and sustaining 100 K requests per hour.
- Instrumented CloudWatch dashboards and alarms to enforce fault-tolerant processing and 99.99 % uptime.

School Management System – Spring Boot & React

Feb 2024 – Jun 2024

- Architected micro-service school management system (Spring Boot, React) lifting user throughput 45 %.
- Added RabbitMQ event bus, slicing API latency 30 % and boosting inter-service reliability for grades.
- Containerized on AWS EKS with blue-green deploys, auto-scaling to exam-week loads at 99.9 % availability.

Task Management System with RBAC

Dec 2024 – Jan 2025

- Created role-based task manager (Node, React) automating workflows and halving manual effort for teams.
- Embedded JWT-secured RBAC, elevating access control efficiency 40 % and tightening audit compliance.
